

Product ID : 2A55DCR Dicer - Gumbo Software, Inc. Page 1
 Release : V2R1M0
 As of : 2018-11-07

<u>PTF ID</u>	<u>Description</u>	<u>Status Date</u>	<u>Superseded By</u>
2C10ALL	Cumulative PTF Package Last Updated 2018/11/07		
2C10001	PID Message File Updates <ul style="list-style-type: none"> o Add new application messages to message file for future enhancement. 	10/09/17	
2C10002	PID Upgrade RTVGSIPTF Command <ul style="list-style-type: none"> o Previously, the Retrieve Gumbo PTF (RTVGSIPTF) command downloaded PTFs using the FTP protocol. Now RTVGSIPTF uses HTTP. Additionally, RTVGSIPTF can access the PTF server through a proxy server, if required by your network, using the new PROXY() parameter. <p>. We anticipate that some installations' networks will have problems accessing the PTF server over HTTP. On a temporary basis, RTVGSIPTF has introduced a PROTOCOL() parameter that allows you to switch back to the old FTP behavior while correcting problems with HTTP service. This parameter will ultimately be removed along with support for FTP as a transport mechanism.</p> <p>. COMPATIBILITY WARNING</p> <p>. HTTP is now the default protocol for PTF retrieval. If your network restricts HTTP access or if a proxy is required for HTTP access the RTVGSIPTF command will fail. If a proxy is required you must fill in the PROXY() parameter. Otherwise you will have to specify PROTOCOL(*FTP) while you resolve problems with HTTP access on your network.</p>	10/10/17	
2C10003	SPL Add PAGERANGE Single Value To MRGSPLF <ul style="list-style-type: none"> o The Merge Spooled File (MRGSPLF) command's Merge input list (MRGFILE) parameter has been modified. Element 5 'Page range to print:' has been given a single value of *ALL which is the default. This avoids a command prompter problem that resulted in an incorrect command string that could not be reprompted. 	08/15/18
